The steps to add a custom network to the MetaMask browser extension are outlined below (the steps are almost identical for the mobile wallet too).

1. Click on the My Accounts button (top-right corner) and go to Settings.
2. Scroll down to Networks and click Add Network.
3. Configure the Network Name, New RPC URL, Chain ID, Currency Symbol, and Block Explorer URL based on the network to be added and click Save.
4. You'll see the newly added network in the dropdown list. Select the custom network and interact with the corresponding dApp.

About

Networks > Add a network

ⓘ A malicious network provider can lie about the state of the blockchain and record your network activity. Only add custom networks you trust.

Network Name

New RPC URL

Chain ID

Currency Symbol (Optional)

Block Explorer URL (Optional)

Network configuration details for adding MuGambo Network

Network name: Mugambo

New RPC URL: <https://rpc-mainnet.mgbscan.com>

Chain ID: 918

Currency Symbol: MGB

Block Explorer URL: <https://mgbscan.com/>

MuGambo

Network Name

New RPC URL

Chain ID ⓘ

Currency Symbol

Block Explorer URL (Optional)

You can click on save and that's it. Mugambo network will be visible on your Metamask Network dropdown now.
